ABOUT ME

I'm a UX- UI Designer & HTML5 Developer having around 12+ years of IT experience, A solid understanding of UX -Visual design challenges for Web and Mobile apps.

I love to collaborate and work as part of a team that can typically include Product owners, Scrum Masters, Project Managers, Business Analysts, Architects and Back-End Developers.

I work in an Agile environment with Product Owner, Scrum Masters to refine and develop the product direction and implementation.

In-depth knowledge of typography, iconography, color, space, and texture. Designing user-centered interaction models, wireframes and Visual designs, Responsive web design.

Work collaboratively with team members to ensure a consistent, integrated brand perception and userexperience. Creating the website from scratch, such as planning & designing the UI and other graphics, developing front ends, as well as testing deploying and maintaining the end-product.

Proven ability in delivering high-quality performance web experience to clients. Strong Knowledge of professional software engineering practices & best practices for the full software development life cycle, including coding standards, code reviews, source control management, build processes, testing and deployments.
